

# Our Solar System

## Inner Planets

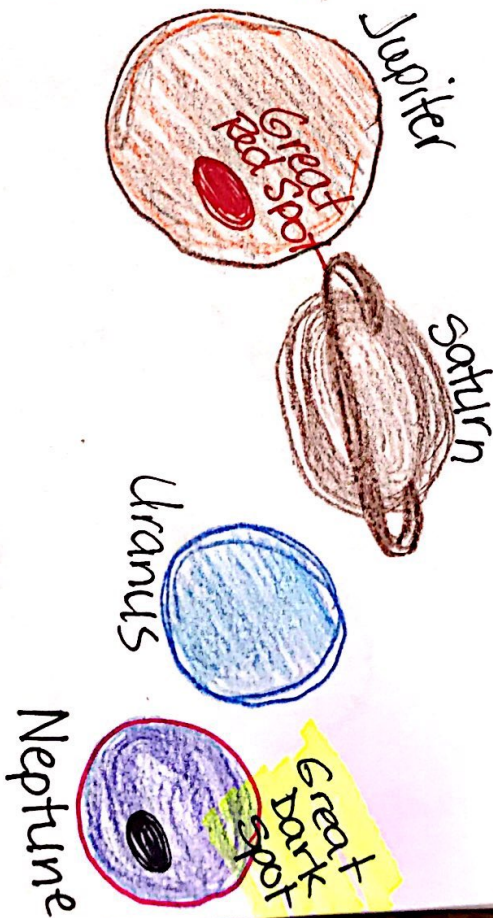

1 Star → Sun

- \* Closest to Sun
  - \* Shorter orbits
  - \* Warmer temperatures
  - \* Rocky surfaces, more dense
  - \* Small diameters
- \* LARGE CORES**

Asteroid Belt: made of Asteroids

## Outer Planets

- \* Farthest from Sun
- \* Longer orbits
- \* Colder temperatures
- \* Thick gaseous surfaces / Atmospheres - less dense
- \* Large diameters
- \* Small icy, rocky cores
